

```
#include<stdio.h>
void rakshitha(char *names[], int size) {
    for (int i = 0; i < size; i++) {
        printf("%s\n", names[i]);
    }
}
int main() {
    char *names[] = {"Rakshitha", "venkatesh", "Nayana"};
    int size = sizeof(names) / sizeof(names[0]);
    rakshitha(names, size);
    return 0;
}
```
